

KRS On-Line e-Renewals Option Available for Washington

The Washington State Department of Agriculture (WSDA) is offering registrants the ability to renew their currently registered products online using the Kelly Registration Systems (KRS). A convenience fee of \$10 per product is charged by KRS to use this service in Washington. WSDA will accept the submission of revised e-labels in PDF format during the renewal period from ONLY those registrants who use the KRS On-Line e-Renewals option to reregister pesticide products in Washington.

Registrants who do not use the KRS On-Line e-Renewals option to reregister pesticide products in Washington may submit revised e-labels using KRS's Pesticide Document Submit service for informational purposes only. However, registrants must still submit two copies of any revised label to WSDA via regular mail.

KRS will send the WSDA the required renewal items via regular mail on behalf of those companies who choose to use e-Renewals option. Use of e-Renewals for the 2006-2007 cycle and submission of revised e-labels during the renewal period is allowed only if the following conditions are met:

- ☒ The appropriate Re-Registration fee (e.g. \$290/product) must be paid by KRS to WSDA by check only. Registrants submit the original registration fee directly to KRS.
- ☒ WSDA receives a completed Application for Registration of Pesticides for each company with an electronic signature.

IMPORTANT NOTICE - SUBMISSION OF REVISED ELECTRONIC LABELS ONLY

WSDA reserves the right to refuse invalid revised labels, which needlessly increase review time. Invalid labels includes illegible, incomplete, and/or identical to those already on file. To avoid this problem, registrants should:

- ☒ Access the KRS website at www.kellysolutions.com/wa,
- ☒ Review the list of products registered in Washington, and
- ☒ Check the label identification code before uploading revised labels to the KRS website.

Please note that Material Safety Data Sheets (MSDS) are not required for registration of Section 3 pesticides. MSDS's are only required for section 25(b) pesticides and spray adjuvants (see <http://agr.wa.gov/PestFert/Pesticides/ProductRegistration>).

For more information, including the terms and conditions of the KRS On-Line e-Renewal option at WSDA, please visit <http://www.kellysolutions.com/erenewals> or contact Steve L. Foss, Washington State Department of Agriculture (phone: 360.902.2049 or sfoss@agr.wa.gov).
